

## Field Service Engineer (Physics)

Mirion Technologies has over 60 years of experience protecting people, property and the environment from the harmful effects of ionizing radiation. We are always on the lookout for talented individuals across all functions who share our passion for technology, excellence and innovation.

Our culture is team-based and progressive. If you are a highly motivated professional with experience in the nuclear, medical, or health physics professions, Mirion<sup>(\*)</sup> may be the place to make a difference.

### Key responsibilities:

- You will visit customer site for preventive maintenances and repairs
- Adaptation and setup of our software products including report writer and databases
- Install hardware and application software products
- Setup of application software in Client-Server and Desktop architecture (Windows based)
- Provide customer training and familiarization
- Help/Advice to our customers and provide software and application supports.
- Support our sales team

### Skill requirement:

- Good Knowledge in Nuclear Physics (Master Degree in Physics / nuclear engineer)
- Experience in Windows Operating systems and Windows-Networking
- Interest in analogue and digital Electronics
- Good inter-personal skills
- Strong communication skills in English, Dutch & French
- Good organizational and administrative skills

### You are:

- **Flexible:** accepts and remains productive with changing targets.
- **Eager** to reach defined goals.
- **Customer service oriented:** clear communicator, tackling problems and needs, finding root causes of problems.
- **A team worker:** asks input from others, stimulates others and creates a team spirit.

For further information you can contact **Agnes Deschins** : [adeschins@mirion.com](mailto:adeschins@mirion.com).
